# Memphis Baptist Church Dothan, Alabama

DbyD-7314

Doors By Decora was commissioned to design, build and install this contemporary Cross Window for an existing church in rural Alabama.

The Leaded Glass was built using over 30 different colors and textures of antique cathedral glass. Over 700 pieces of glass were individually cut, fitted and leaded together to build this window. Because of the bright sunlight coming through the window this picture does not show all the detail and brilliance of the glass.

Church Stained Glass

# St. Vincent de Paul Catholic Church Tallasse, Alabama

DbyD-7339

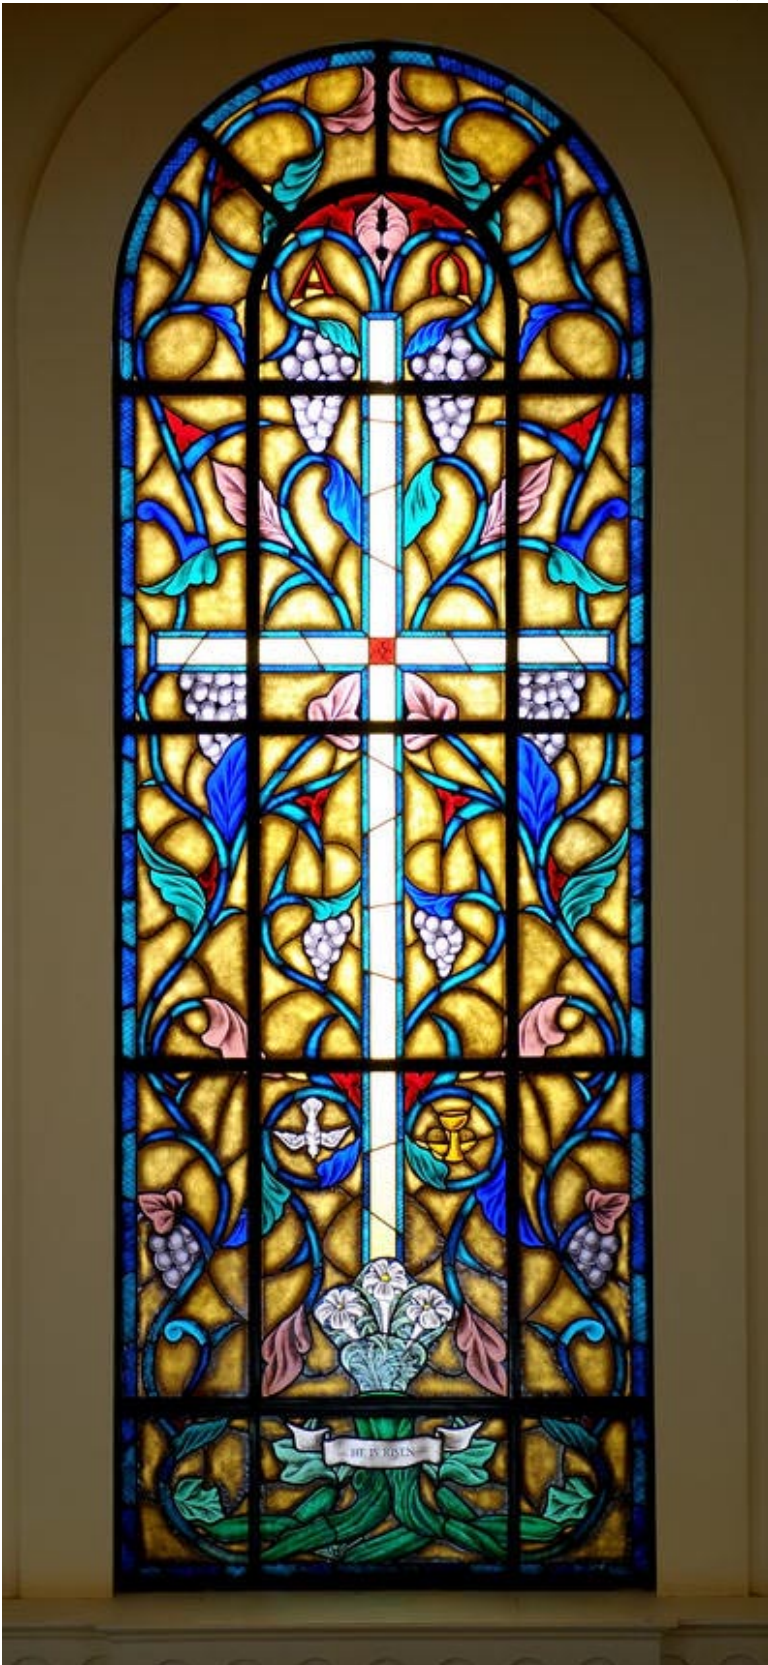

Doors By Decora designed, built and installed Stained Glass Windows replacing the existing windows in this old Catholic Church. The Priest had a special request that the painted medallion shown on the left be done of St. Vincent de Paul to match an old picture from his files.

The Priest (in his 90's and still an avid golfer and an active Priest) returned several years later for us to build a "Cry Room" window saying members had raised the money and wanted the window made in "his memory" but we decided to not rush things and the wording was changed to in "In Honor of Father Lynch".

# Young Meadows Presbyterian Church Montgomery, Alabama

## DbyD-7315

When construction began on Young Meadows Presbyterian Church in 1996, Doors By Decora was contacted about designing and building the stained glass windows for this church. The windows consisted of the 7 ft. X 24 ft. Cross Window behind the choir loft. The window was constructed of over 500 pieces of glass that were individually cut, assembled, and leaded together. Most of the pieces were also hand painted for detail and to give shading to look old and had to be fired in a kiln. The window had to be designed and built to be backlit since it is not on an outside wall.

There were also 2 ft. X 14 ft. windows (one in a stairwell and the other in a classroom) that required special consideration in lighting so that they did not show shadows from the outside.

The 7 ft. rose window pictured below is installed in a small mechanical room which required lighting that would not show shadows from pipes and the air conditioner.

# St. Paul's Episcopal Church Selma, Alabama

DbyD-7302

St. Paul's Episcopal Church was founded in 1838. The stained glass windows in the sanctuary of this historic church were built by some of the major stained glass companies of the 19th Century including one built by Tiffany Studios of New York. The windows shown here were designed, built and installed by Doors By Decora in conjunction with Lay Leader James Hammond. Doors By Decora also built custom mahogany frames to use to install these Gothic arch windows in existing rectangular window openings in the church offices. Doors By Decora also built custom mahogany doors to replace all the interior doors in the church.

# Faulkner University Montgomery, Alabama

DbyD-7324

Faulkner University (formerly Alabama Christian College) commissioned Doors By Decora to design, build and install this 14 foot rose window in Black Hall that was built in 2000. The picture to the left shows the installation of this window.

Church Stained Glass

# Millbrook Presbyterian Church Millbrook, Alabama

DbyD-7337

This small church of less than 200 members asked members to donate windows "in memory of" a loved one to replace the existing windows in 1995. We built Mahogany Sashes, Stained Glass Windows, Church Doors, and Installed them. To help keep the cost down we supervised volunteer labor from the church who tore out the old windows. Later we designed and built the doors pictured below for this church. In 2008 this church had grown and built a new sanctuary and we built stained glass windows and doors for this building (not pictured).

# First Baptist Church East Brewton, Alabama

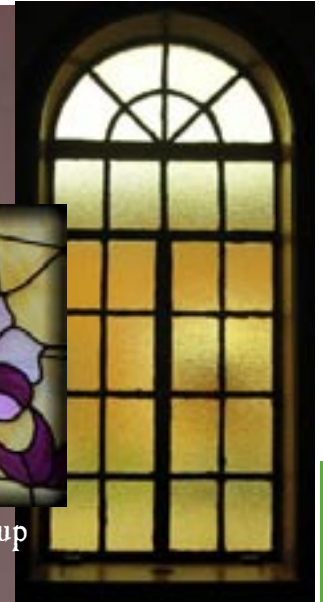

## DbyD-7335

In 1994 Doors By Decora was commissioned to design, build and install replacement stained glass windows for the First Baptist Church of Brewton, Alabama. Pictured to the right is one of the new windows and a "Before" picture. We also built, finished and installed new mahogany front doors for the church.

In 2000 the church built a new fellowship hall and pictured at the lower right is one of the stained glass windows we built for it. We also built and installed all of the Mahogany exterior church doors for the new fellowship hall. Below is a picture of the front door and transom to the fellowship hall.

# Headland United Methodist Church Headland, Alabama

DbyD-7345

Headland United Methodist Church commissioned us to design and build Stained Glass Windows to replace the existing iron roll out windows in the Church. Pictured are 2 of the windows one with a painted medallion of a Christian Symbol and the other showing a picture of the "Empty Tomb". There is also a close up of Jesus at Gethsemane.

The Gothic Transom shows "The Last Supper".

The old window frames had to be cut out with torches and we built and installed bronze anodized frames for the new stained glass and installed Lexan on the outsides to protect them from vandalism. The church raised the money for the windows by allowing members to order windows "In Memory of a loved one". The response was very successful and they not only raised enough money for the project but also for new windows for the choir room.

# Burkeville United Methodist Church Burkeville, Alabama

DbyD-7320

In 1985 General Electric bought the old Burkeville United Methodist Church building and property. When they relocated, Doors By Decora was commissioned to design, build and install stained glass windows for the new building. This small church had a very limited budget and Doors By Decora's owner donated the window in the Prayer Room in memory of his parents, Mr. and Mrs. Edwin H. Jones of Elba, Alabama both of whom had recently passed away. This was one of our first church jobs and even the owners wife, Marcy Jones, helped by cleaning the windows as they were installed. You can read the letter at the bottom of the page to see what this customer had to say about us by going to [www.doorsbydecora.com/dbyd7320](http://www.doorsbydecora.com/dbyd7320).

# First Assembly of God Church Tifton, Georgia

DbyD-7360

One of the fun things about Doors by Decora is the interesting relationship we have been able to form through the years. We were contacted in the 80's by Rev. O. L. Stokes, pastor of First Assembly of God Church in Tifton, Georgia. He wanted us to build a stained glass window he had designed for the vestibule in his church. This window was to be on an interior wall and had to be backlit. When we arrived to install the window we found out that not only did he design the glass but made the modifications to the building to accommodate the window.

# First Assembly of God Church Tifton, Georgia

DbyD-7361

First Assembly of God Church was started in a tobacco warehouse in Tifton, Georgia. Brother Stokes took over as Pastor in 1961. He always had interesting ideas such as the Childrens Education Building below built like Noah's Ark. Once again Bros. Stokes commissioned us to build this stained glass window that he designed. Pictured with his hand on the window to the left is Bros. Stokes. In the lower pictures from the left are the owners wife, Marcy Jones, his nephew and first employee Troy King who is now Attorney General for the State of Alabama, and his son and now VP of Marketing J.K. Jones.

Brother Stokes retired after 32 years but has continued to keep in touch with us and bring us new projects.
